# FAST FREIGHT MARCONI SERVICES

## CUSTOMS CLEARANCE

The Fast Customs Clearance Centre was recently set up and includes a system developed by FFM that allows both the aviation sector and government bodies – Customs - to determine whether a shipment will require prior inspection at Bologna Airport based on electronic pre-departure and pre-arrival information.

Clients of Fast Freight Marconi's Customs Clearance Centre will have their freight ready to deliver in 4 hours' time after arrival (against present average of 2/3 days)

# FAST FREIGHT MARCONI SERVICES

## SECURITY CHECKS

Air freight is based on the 'known shipper' principle: freight has to be declared.

For this reason Airports and flight Operators are facing increasingly stringent security requirements, which necessitate a complete check of the freight for any dangerous elements. X-ray inspections of pre-packed ULDs thus constitute a major intervention in the work flow in the cargo handling process

FFM has recently obtained the Italian Transport Ministry Authority's (ENAC) Certification for "Agente Regolamentato" (Known Shipper)

# FAST FREIGHT MARCONI SERVICES

## ROAD FEEDER SERVICES

As far as major cargo destinations are concerned, Bologna Airport is a central location in Europe  
FFM can provide domestic as well as international truck services

# FAST FREIGHT MARCONI
